

① PRE SORT
Workers hand pick large material and glass for recycling and remove contamination

② DISC SCREEN 1
Separates paper, cardboard, and containers. Broken glass drops through

④ DISC SCREEN 2
Separates paper from 3D containers like bottles, jars and cans

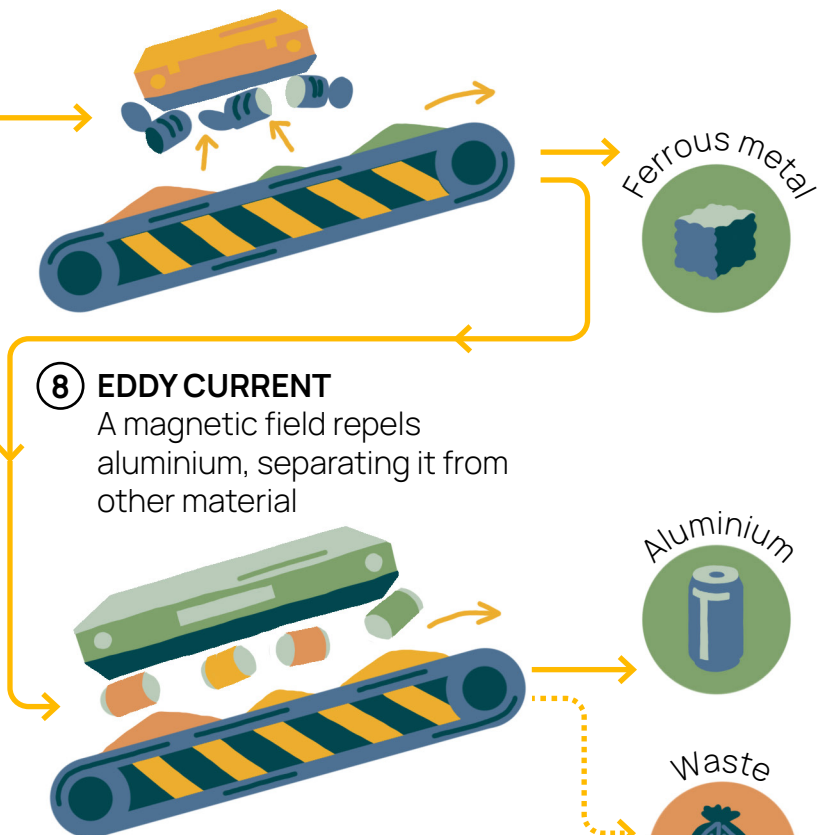

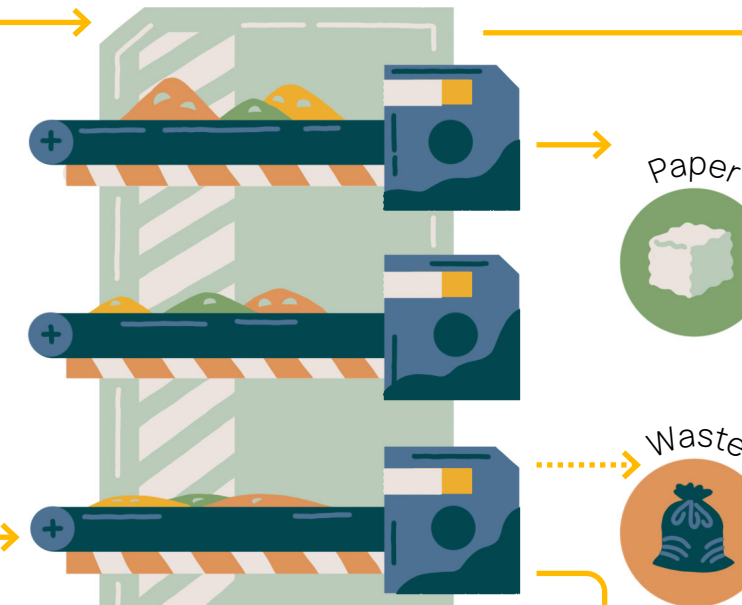

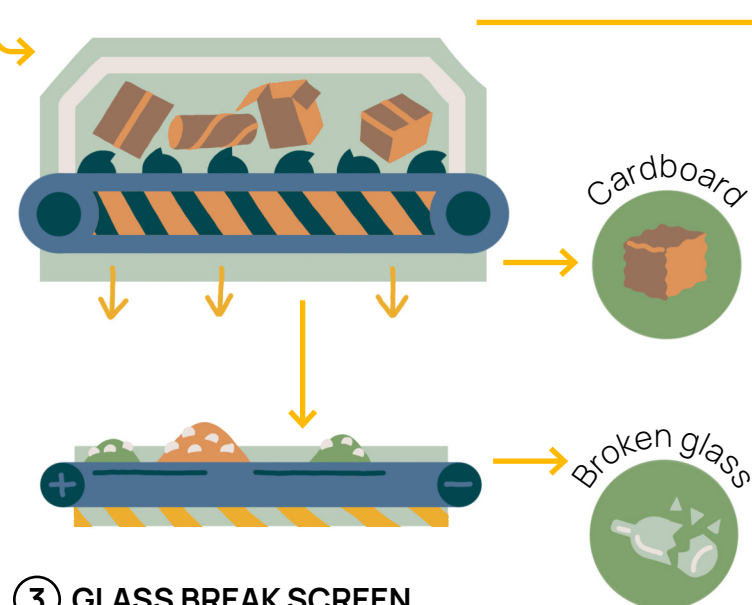

⑤ OPTICAL SORTER x3
Uses infra-red light to separate paper and containers from waste

⑦ MAGNET
A magnet separates steel containers

⑧ EDDY CURRENT
A magnetic field repels aluminium, separating it from other material

⑥ MANUAL SORT
Workers hand-pick 10c refund containers

⑨ OPTICAL SORTER X 2
Uses infra-red light to identify and separate different types of plastic

③ GLASS BREAK SCREEN
Glass is broken into smaller pieces
